

JOÃO VINICIUS MARTINS

MECHANICAL DESIGNER · SPECIAL MACHINES & AUTOMATION · MANAUS, BRAZIL (UTC-4) ·
OPEN TO REMOTE WORK AND RELOCATION

JVM MARTINS2004@GMAIL.COM · PORTFOLIO: JONICIUS.GITHUB.IO/

CAD & TOOLS

Autodesk Inventor
PTC Creo Parametric
Autodesk Fusion 360
AutoCAD
FluidSIM (pneumatics)
FDM 3D printing / slicing
Microsoft Power Apps & Power Automate

SKILLS

Machine design: gantries, conveyors, feeders, grippers, jigs and fixtures
Large assemblies (300+ components)
2D manufacturing drawings, medium-high complexity
Electro-pneumatic circuit analysis
Integration of catalogue components (linear actuators, guides, ball screws)
Raw-stock sizing and cost estimation
Basic metrology

LANGUAGES

Portuguese — native
English — intermediate
French — basic

EDUCATION

B.Eng. Mechanical Engineering
IFAM — Federal Institute of Amazonas
Expected 2027

Mechanical Technician
IFAM, 2022

COURSES

Capacitar 4.0 — Industry 4.0 training, 480 h (IFAM, 2023)

PROFILE

Mechanical designer with a shop-floor background. I design automation equipment and tooling in Inventor and Creo, from concept to detailed assemblies and manufacturing drawings, and I follow the parts through fabrication. Started in plant maintenance, moved through R&D machine design and now work in the toolroom of a global consumer-goods manufacturer.

EXPERIENCE

MAY 2025 — PRESENT

Engineering Intern, Toolroom — BIC Amazônia

- Design of machines, jigs, fixtures and tooling in Inventor and Creo; detailing of manufacturing drawings
- Raw-stock sizing and cost estimates for fabricated parts
- Followed parts through fabrication: CNC machining, grinding, wire and sinker EDM, heat treatment, polishing
- Built an internal purchasing assistant on Microsoft Power Apps / Power Automate

MAR 2024 — PRESENT

CAD Designer — applied R&D institute, automated packaging line project

- Contributed to the mechanical design and 3D modeling of a five-module line as part of the project team: gantry loading cell with tray trolleys, pick & place cell with flow-rack feeder, label print & apply station, leaflet insertion module and a 4.7 m twin-belt transfer conveyor
- Assemblies of 200–380 unique components per module; worked with SMC electric actuators, linear guides, ball screws, vacuum grippers and machine guarding

2023

Researcher, Additive Manufacturing — IFAM

- Technical and economic feasibility of 3D-printed assistive technology
- Taught workshops and short courses on additive manufacturing

2023

Basic Metrology Instructor — CETAM / IPAM

2022

Mechanical Maintenance Intern — Michelin

- Corrective and preventive maintenance: bearings, shafts, gearboxes, rollers, press molds
- Maintenance of pneumatic systems: directional valves, actuators, FRL units
- Toolroom fitting: grinding, milling, welding
